

Contact & Symptom Tracking Software for Public & Tribal Health Departments and Large Organizations.

The first secure HIPAA compliant solution to effectively track Contacts & Symptoms for COVID-19 and anyinfectious disease.

SmartTracker automates data collection in real-time to protect communities, enhance risk mitigation, and exposure investigation to prevent the disease spread.

Simple Form Design

Easily customize your forms to meet local, state or federal requirements.

Automated Reminders

SmartTracker Reminder widget will keep all your tasks and reminders organized. Categorized by upcoming or past due, each task can be accessed and completed from your dashboard.

Easy To Use

SmartTracker designed as the Contact and Symptom Tracing platform that saves your public health department or agency time by making a complicated process streamlined and simple.

Reports

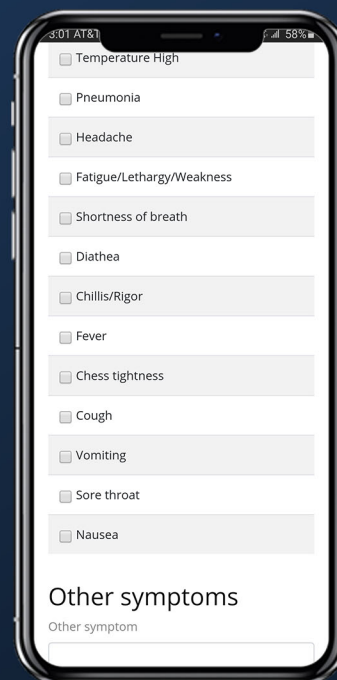

With the support of SmartTracker Reporting, you can generate various types of reports about the person's symptoms, your caseload, and an accessible summary of all existing documentation for any individual.

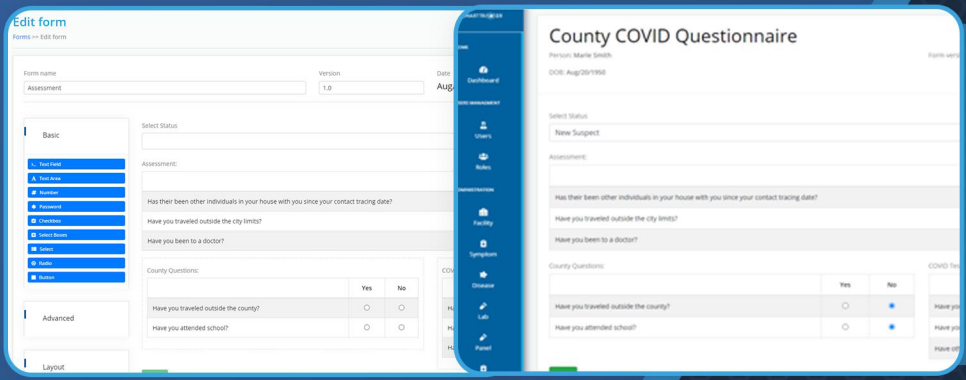

Interoperable

SmartTracker is built to send data directly to registries securely via FHIR or HL7. Saving staff time and eliminating errors and manual dual data entry.

Self Track (eForm via SMS / eMail)

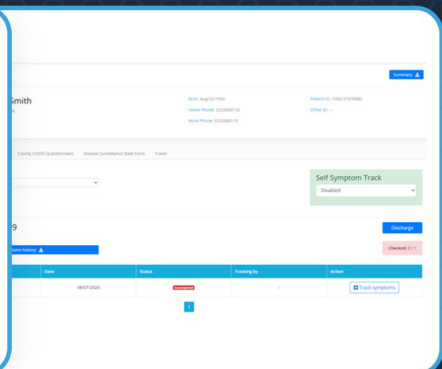

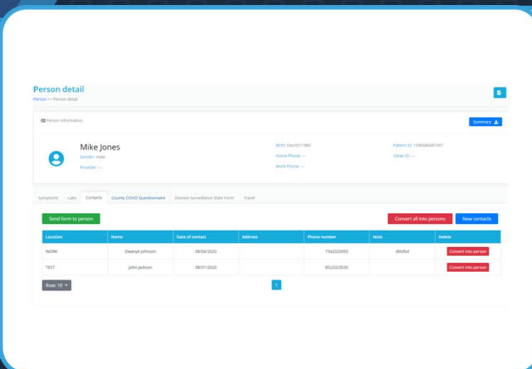

SmartTracker sends suspected individuals an SMS or email eForm that allows them to complete their symptom tracking form from any DEVICE (smartphone, tablet, laptop or desktop)

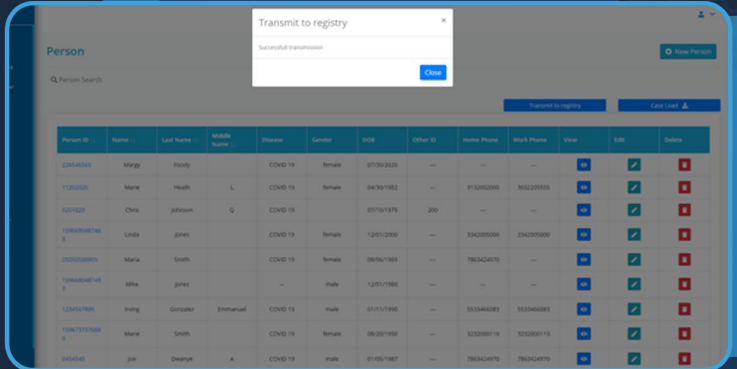

Simple Form Design
